

Always Writes - Never Clogs

WHEN you pick up your pen to write you want it to be ready to give you instant service. Being ready is the point on which the Everflo is fast gaining its popularity. You do not have to shake the Everflo to get the ink started. Just push the plunger and your pen is cleaned, primed, and ready for use.

No special way of holding the Everflo is required to make it write. It will do the work, which you wish it to do, at any position on the point. The Everflo will do extraordinarily hard work, which any ordinary pen will not do. It will make carbon copies, and address packages wrapped with rough paper. It will also do anything that a fountain pen will do.

The average stylo pen has to be taken apart to be cleaned. This causes delay and many times one's hands become covered with ink. All of this trouble is done away with when you purchase an Everflo.

THE NEEDLE ADJUSTMENT on this wonderful new ink pencil gives you more advantages than any other pen or pencil on the market today. It makes the pen suitable to anybody's hand as well as governing the flow of ink. This adjusting feature also protects your pen from scratching.

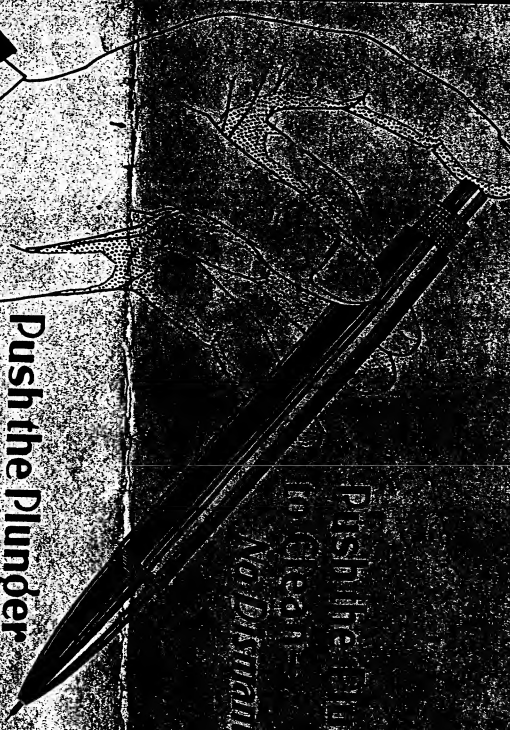

It is not a fragile pen but a good sturdy pen, which is fool-proof and will stand lots of abuse. The pen sells at a moderate price and has long wearing qualities. Stenographers, shipping clerks, billing clerks, children and old people with shaky hands; and in fact everybody who uses a pen or pencil likes the Everflo.

Let your next pen be an Everflo. Every pen carries a written guarantee which is iron-clad.

**E**VENFLO PENS are made in two sizes. A, the small pen, is 4 1/2 inches long, and B, the large pen, is 5 1/2 inches long as shown in catalogue. They can be furnished with either plain or engraved gold bands. The cost of engraved bands is the same as the plain bands. The above code and cuts give the numbers of the pen as well as the retail price. When ordering state whether plain or engraved bands are desired. An extra charge of 50 cents is made when chain eye is desired on gold banded pens.

The Evenflo is the only ink pencil on the market today which has a self-cleaning and priming feature. You do not have to take the Evenflo apart to clean it. Just push the plunger and this cleans and primes it at the same time. Every Evenflo Pen is guaranteed to give perfect satisfaction.

No special kind of ink is required for the Evenflo. Any good blue black fountain pen ink will give you a nice even flow. If a fast flow is desired, Violet, Purple or Green ink will give the desired results.
